A 3D bar chart with three axes. The vertical axis (y-axis) is labeled from 0 to 60,000 in increments of 10,000. The horizontal axis (x-axis) is labeled from 0 to 200 in increments of 20. The depth axis (z-axis) is labeled from 0 to 200 in increments of 20. The chart displays a series of bars that decrease in height as they move away from the origin along the x and z axes. The bars are arranged in a grid-like pattern, with the highest bar at the origin (0,0,0) and the lowest bar at the far end of the axes (200,200,200). The bars are white with black outlines. The chart is enclosed in a 3D box with dashed lines for the hidden edges.
